PROJECT NAME:

Fitness Flooring

CLIENT:

Ecore
www.ecoreintl.com

DATE:

Ongoing since May 2010

DELIVERABLES:

Custom Carton, ¼ Pallet
Display, and their Fulfillment

ABOUT THE PROJECT:

In order to sell their exercise floor tiles in store, Ecore required a sturdy, easy to carry box and an attractive display. A complete set of tiles weighs around 40 pounds, so we designed a die cut carton that is reinforced along the spine and corners and has a convenient plastic carrying handle. Additionally, we created a ¼ Pallet Display to feature eight boxes. Due to time and space constraints at Ecore, we also handle the fulfillment of this project. We begin with the assembly of the cartons, then fill them with the floor tiles, and stack and store them while displays are being assembled. Ultimately we fill the displays and prep them for shipping to one of many sporting goods stores.
